

4 TIPS FOR SAFE ONLINE SHOPPING

- ✔ Before making any online payments, ensure a secure connection by verifying that the website's URL begins with "https://" and has a padlock symbol in the address bar.
- ✔ Don't click on links in unsolicited emails or pop-up ads; instead, directly access the retailer's website by typing the URL into your browser.
- ✔ Enhance transaction security by using a secure personal network instead of public Wi-Fi, as public networks are less secure.
- ✔ Use a password manager to store the passwords for all your accounts, because passwords are the first line of defence against online threats.
