**DATA PRIVACY DAY**
JAN. 28, 2022

How to protect your data

Everyone at the University of Toronto (U of T) can help protect U of T's data and information systems from data breaches and other information security incidents. Learn how:

UNIVERSITY OF TORONTO | Information Technology Services

Self-enrol in UTORMFA

UTORMFA, U of T's multi-factor authentication solution, protects your data by adding an extra layer of security to your login.

14,300+ U of T members enrolled

Safeguard your work environment and emails

Take simple steps to protect your work environment and emails, such as encrypting email attachments containing personal information.

Look out for the latest phish

Our Phish Bowl keeps the U of T community informed of the latest phishing attacks.

Learn how to handle security incidents

The U of T Incident Response Plan outlines the steps employees should take in the event of an information security incident.
