THREE STEPS IN FIVE MINUTES TO
PROTECT YOUR PRIVACY

@ITSUOFT @UOFTCYBERAWARE
SECURITYMATTERS.UTORONTO.CA

1. If your UTORid password could be stronger, now is the perfect time to change it.

Your UTORid protects a lot of sensitive personal information, and your password should reflect that.

Remember: keep it **long and easy to remember** or **short and highly complex**.

2. Ensure your social media settings reflect your preferences.

Double-check the privacy settings on your most used social media accounts. Consider what information you want to share with the public and make sure your **account settings** reflect your personal privacy preferences.

Learn more here:

<https://securitymatters.utoronto.ca/resources/managing-your-online-reputation/>

3. Don't share information if it's not required and/or necessary.

Do you need to share your home address on your LinkedIn profile or announce when you'll be on vacation on Facebook? Probably not. Personal information should be kept private unless it is **directly pertinent or required**.
